

# SECRETS OF BARBARA LOE FISHER

*by Omar Jordan*

The following information is a presentation of evidence, combined with **my opinions**, based on factual details available in the public domain. My opinions are based on the evidence. I do not claim to present an overarching or objective truth, and I encourage all readers to engage in their own research by following the links available in this document. It is up to each individual to research for themselves in order to determine whether or not your conclusions align with my assessment and analysis of the evidence. Consider this document a starting point to a larger body of research and more thorough investigation.

This paper will attempt to show that Barbara Loe Fisher and the National Vaccine Information Center are NOT on the side of the people and not who they claim to be. By the time the reader is finished examining the evidence, this author is confident that many will agree with my conclusions.

First, let's get the official story [from Wikipedia](#):

*The **National Vaccine Information Center (NVIC)**, founded under the name **Dissatisfied***

*Parents Together (DPT) in 1982, is an American 501(c)(3)<sup>[1]</sup> organization that has been widely criticized as a leading source of fearmongering and misinformation about vaccines.<sup>[2][3][4]</sup> While NVIC describes itself as the "oldest and largest consumer-led organization advocating for the institution of vaccine safety and informed consent protections",<sup>[5]</sup> it promotes false and misleading information including the discredited claim that vaccines cause autism,<sup>[6][7][8]</sup> and its campaigns portray vaccination as risky, encouraging people to consider "alternatives."<sup>[9]</sup> Like other **anti-vaccination** groups, NVIC has been investing heavily into its social media presence in the 2010s.*

So far, we have learned that NVIC is an “anti-vaccination” group which was founded under the name *Dissatisfied Parents Together* in 1982. The mainstream version tells us that they are a leading source of fearmongering and misinformation about vaccines which promotes false and misleading information about vaccines. Given that Wikipedia usually parrots the mainstream’s position, we can generally conclude that the mainstream’s position is NVIC is a leading anti-vaccine organization. Wikipedia also tells us that NVIC:

*“was co-founded in 1982 by Jeff Schwartz, Barbara Loe Fisher, and Kathi Williams under the name **Dissatisfied Parents Together (DPT)**.<sup>[14]:8</sup> Each of them had observed the health of one of their children deteriorate at some point after receiving a dose of the DPT vaccine and had watched a television broadcast of the film *DPT: Vaccine Roulette*, which drew an erroneous causal link between DPT vaccines and illnesses of some children who received them.<sup>[14]:1–6</sup> In 1985, Fisher and Harris Coulter co-authored a book, *DPT: A Shot in the Dark*, which asserted an association between the whole cell pertussis (whooping cough) vaccine in the DPT shot and autism”.*

Now that we have the official, mainstream’s version of the story, let’s examine the details and see if it holds up to careful scrutiny.

The first thing that we should establish here is that the official story creates a version of reality where the NVIC is on **our** side, fighting against the system and **for** the people, specifically as an advocate for those injured by vaccines.

Barbara Loe Fisher is the head of the [National Vaccine Information Center](#). NVIC *pretends* to be on our side, but I intend to illustrate that this is an illusion.

Barbara Loe Fisher calls herself "**pro-vaccine and pro-choice**". The NVIC was founded in 1982 by petrochemical/banking industrialists, hijacking and subverting the purely grassroots **Determined Parents Together (DPT)**. After hijacking **Determined Parents Together**, they changed the name slightly to **Dissatisfied**

**Parents Together.** From there, the NVIC's evolution was based on massive pure propaganda administered principally by current President Barbara Loe Fisher.

So what is the *real* story about how the NVIC was founded?

### **The true detailed story about the founding of the National Vaccine Information Center**

The following information has been corroborated by Dr. Horowitz and Dr. Robert Mendelsohn prior to his death, is available on the Internet, courtesy of a Mothering Magazine contributor, pen-named "Momtezuma Tuatara."

It should be noted that Dr. Horowitz is another deception agent, but the bulk of the details of how this story unfolded seem to be true and corroborated by multiple sources.

"Had the National Vaccine Information Center, (then primarily known as "Dissatisfied Parents Together") not got into bed with the paediatric associations in order to put together the 1985 National Vaccine Injury Compensation Act, there would not now be totally ineffective, unfair legislation for parents to wade through, and...

Had the NVIC joined together with all the other groups at the time, in actively opposing it, and retaining for parents the right to have the tort system as first option, there would have been no incentive for vaccine manufacturers to have broadened into other vaccines.

By tearing apart another organisation, called **Determined Parents Together**, and then siding with the paediatric associations, NVIC split apart the strength of the real advocates for children ~~ and by splitting them apart, gave the medical profession the grist they needed to call Jeffrey Schwartz and Barbara Loe Fisher the "sane moderates," and dismiss the rest as lunatic fringe hippies.

The legislation you have now, is the direct result of that collaboration.

If you read [Marge Grant's book "A Stolen Life"](#), that will show you how the National Vaccine Information Center started, how they disembowelled

**Determined Parents Together**, and will give you an understanding of why/how

that happened.

Dissatisfied Parents [Barbara Loe Fisher and Jeffrey Swartz] hijacked Determined Parents, on a TV programme called *Vaccine Roulette* early in the 80's, by substituting their address, for that of Determined Parents together, ~~ (by telling the producer, while the head of Determined Parents was live on air in the TV studio, that they worked together) ~~ which resulted in all **Determined Parents Together's** mail being diverted to **Dissatisfied Parents Together**, which formed the case basis for the book called "DPT – A Shot in the Dark" and the member foundation for what is now NVIC.

Dr. Mendelsohn who was also live on that programme was furious about it and wrote to NVIC demanding that they return Determined Parents Together mail to them, to no avail.

This resulted in the collapse of Determined Parents together, the building of Dissatisfied Parents Together, who then used Jeff Schwartz to liase with the paediatric organisations and work in collaboration to implement the compensation act, which they [allegedly] believed was the right move [to deprive and damage Grant, outrage Mendelsohn, and deliver the opportunity for no-liability for vaccine injuries to Big Pharma].

The NVIC support of the act was then followed by a double betrayal from the Paediatrician organisations, who, having used NVIC to suit themselves, waited until the legislation was a couple of years old, and changed the table to effectively block the majority of claims possible.

So, in summary, both the National Vaccine Information Center, and the National Vaccine Injury Compensation Act is WHY we:

- 1) have so many vaccines in the schedule now, and
- 2) why it's near impossible to get compensation for vaccine injury.

Some might say that it was naivety that lead to Jeff Schwartz and Barbara Loe Fisher going down that road, but I don't believe it was, because I and many other parent groups, the testimony of whom can be seen in the senate proceedings,

warned them what would happen, both personally and in writing.

However, NVIC had the backing of a paediatrician called Kevin Geraghty and a whole lot of medical moderates, which was all part of the attraction to the legislators.

NVIC did not have the backing of Dr Robert Mendelsohn, who copied me into his correspondence with NVIC, neither did they have the backing of any of the other parents organisations, or the other organisation then working for parents of vaccine damaged children run by Dr Anthony J. Morris, then called *The Bell of Atri* which was formally disbanded several years ago, but ran from the campus of Maryland University.

If you want to check some of this out, you have the right, being taxpaying citizens of the United States, to obtain a copy of senate records at no cost to yourself. Go/ring the Library of Congress. Ask for a copy of the NATIONAL CHILDHOOD VACCINE INJURY COMPENSATION ACT OF 1985 : “Hearing before the Committee on Labor and Human Resources United States Senate, Ninety-Ninth congress, first session on S.827, July 18 1985.

You could also ask for another one the year before that, but I didn't keep the whole one of that like I kept the whole 1985 one. The 1984 one had bits of more interest to the early story. I don't know its number. I have extracts of it somewhere, but have just spent an hour trying to find them and can't. Which is what happens when you systematically tidy, and refile key information. If I find it, I will put the number and title up.

Read that (or those), and see for yourself.

NVIC is the organisation that legislators etc will half-way listen to, since they got what they wanted by using them.

Has NVIC ever been an effective advocate for parents in any real context? Only you can answer that for yourself. But NVIC is now left in a position where all they can do is splutter about a situation they don't like, put out newsletters criticising various decisions and vaccine implementations, and ask you for money to fight

the very empire they helped bring about in the first place.”

[Source](#)

To gain control over Determined Parents Together, Fisher allied with vaccine industry lobby-linked attorney Jeffrey Schwartz. They stole the contacts of parents of vaccine-injured children generated by Marge Grant, a mother of a DPT vaccine-injured child who appeared on the Phil Donahue Show.

Fisher and Schwartz ousted Marge Grant to form the NVIC that has, ever since, commandeered near exclusive mainstream media coverage of the public's opposition to vaccinations using the “Big Lie” – that vaccines are generally good.

Thus, from the NVIC's conception, the Rockefeller banking and petrochemical cartel has enabled it as “controlled opposition” to advance world vaccination programs. Murder by injection is the “sacred cow” of “public health” – the “Big Lie” commanding a slow genocidal depopulation and promoting profitable wars against “germs” and humanity in general.

Fisher appeals emotionally to audiences recalling her own son's intoxication through vaccinations, yet still promotes the “Big Lie” in order to psychologically prepare Americans to accept vaccination injuries (like her son's), and “immunization” policies, as generally acceptable. She slanders those telling the WHOLE truth about vaccinations as “RADICALS.” She defends this by claiming such censorship is needed for NVIC to have a political impact.

Fisher played a leading role in the “war” waged against vaccine injury compensation by Big Pharma. By 1982, following 60-Minutes's coverage of the deadly Swine Flu vaccine fiasco, and Marge Grant's DPT appearance on national television, the “war” was turning against the drug industry.

So Fisher and Schwartz were called upon to lobby with other pro-vaccinationists co-constructing the National Childhood Vaccine Injury Act of 1986.

Schwartz, the NVIC's first President, had worked for “Mr. Health” — Florida Rep. Paul Rogers who led Congress to advance the 1976 swine flu vaccination program. Rogers then crafted the legislation **eliminating vaccine victim compensation**. He was subsequently rewarded by the industry with a position

on the board of directors of Merck, Sharp & Dohme, the world's leading vaccine maker.

Fisher's propaganda techniques have been totally cynical. She bemoans all the catastrophes vaccines have caused, but then credits herself, the NVIC, Congress, and vaccine regulating agencies, thusly: "In 1986 Congress said 'Yes. Vaccines can kill and brain-injure children,' and created the federal vaccine injury compensation system...."

She purposely neglects the fact that this system has left hundreds-of-thousands of vaccine injured families completely uncompensated. The \$X billion paid out is a drop-in-the-bucket compared to profits and actual damages.

Fisher wrote, "Forced vaccination, forced use of prescription drugs and forced quarantine in non-home locations . . . is the line in the sand for NVIC."

In other words, administering pharmaceutical genocide, or volunteering to accept it, is just fine for America's leading "anti-vaccination" activist.

Barbara Loe Fisher...has held terminally to her position that some vaccines may be good, or fine for some people. Likewise, she wrote recently that quarantines may be good, or fine for some people. To be good political activists, we need to "make concessions," she has asserted.

On May 4, 2021, the NVIC was censored and deplatformed by Facebook and Instagram. On the surface, the knee-jerk reaction is to scream bloody murder and conclude that the social media platforms are "censoring the truth" - but this is a trick. It's sleight-of-hand. NVIC are on the same team. So, before we continue, let's first establish NVIC's stance on vaccines.

*Though NVIC is **neither "pro-" nor "anti-" vaccine**, the group is a target because it provides reputable scientific information to parents and medical professionals about vaccine safety concerns, from individual "lots" of vaccines that are recalled by the manufacturer or prove problematic; to peer-reviewed, published studies related to vaccine safety issues. [Source](#)*

Got that? They're not anti-vaccine. So let's hear what Vaccine Warlock Barbara Loe Fisher has to say about getting deplatformed:

Founder Barbara Loe Fisher [says](#),

*"Big Tech's thought police are particularly upset when NVIC posts information about reports of serious COVID-19 vaccine complications and deaths, while descriptions of COVID-19 disease complications and deaths are allowed on social media platforms without restriction."*

Sounds reasonable enough, right? But that's why you have to dig further to unravel these people and their clever scams.

*In 1982, after the national broadcast of the award winning television documentary "DPT: Vaccine Roulette," **parents** in the Washington, D.C. area whose children had been injured by the DPT vaccine founded **Dissatisfied Parents Together** (DPT) and launched what is now recognized as the consumer vaccine safety movement in the U.S.*

*In 1985, the book DPT: A Shot in the Dark by Harris Coulter, Ph.D., and Barbara Loe Fisher, co-founder of **Dissatisfied Parents Together**, was published by Harcourt Brace Jovanovich indicting the whole cell pertussis vaccine and documenting serious flaws in America's highly politicized mass vaccination program.*

*Media coverage of DPT vaccine associated injuries and deaths became widespread and, although most vaccine injury lawsuits were settled out of court for modest sums (with pressure being placed on plaintiff's to agree to having all court records sealed from public view as a condition of settlement), there were several well publicized multimillion dollar awards against vaccine manufacturers.*

But we already know the story about how NVIC was formed and about how Barbara Loe Fisher hijacked the real anti-vaccine movement. So why would the media suddenly start reporting "widespread" stories about vaccine injuries? Because they are MISDIRECTING.

*These events were immediately followed by pressure placed on Congress by the vaccine manufacturers, including Lederle, Connaught and Merck, **to pass an exclusive remedy federal vaccine injury compensation program that would remove all liability from drug companies who make vaccines and physicians who administer vaccines.** The threat the drug companies delivered to Congress, with the help of physician organizations such as the American Academy of Pediatrics and the American Medical Association, was that they would stop producing vaccines for the nation's childhood vaccination program.*

*In response, in 1986, President Reagan signed the National Childhood Vaccine Injury Act. The law was to have created a non-adversarial, no-fault alternative to lawsuits for victims of mandatory vaccinations. It also: included safety provisions such as a centralized vaccine adverse event reporting system; mandatory reporting by doctors of hospitalizations, injuries and*

*deaths following vaccinations; mandatory record keeping by doctors of vaccine lot numbers and reactions; and requirements that doctors give patients/parents vaccine benefit/risk information. Punitive damages in lawsuits against vaccine manufacturers or physicians were outlawed, except for cases where criminal negligence would be proven. However, Congress did not completely remove all liability in the court system from the vaccine manufacturers and preserved the right of vaccine victims to bring a lawsuit if they were turned down by the federal system or they considered the award to be too small.*

Are you seeing how this game is played? Keep reading.

*Following the law's passage, the Departments of Justice and Health and Human Services systematically gutted the program and made it highly adversarial. Each claim was fought by taxpayer funded government lawyers and hired physician experts. Compensation was denied to three quarters of all child vaccine victims. What was to have been a fairer, less emotionally draining, and less time consuming alternative to litigation, turned into a sham. Dissatisfied Parents Together, which operates the National Vaccine Information Center (NVIC) and helped to create the law, described the program as "a drug company dream, a consumer's nightmare, a scientific travesty, and a national tragedy."*

*"What we have in this country," said Barbara Loe Fisher, NVIC Co- Founder and President, "is that every citizen is forced by law to use vaccines which are being poorly studied, tested, and regulated for safety, as well as unsafely administered, and no one is held accountable when a citizen, usually a child, is injured or killed by that product. No other product in America is protected from the pressures of the marketplace like that. The public has little way to exert economic pressure to force bad vaccines off the market, force improvement of existing ones, or force doctors to administer them more safely because nobody has the right to refuse to use them or hold manufacturers and negligent physicians accountable when injuries and deaths occur."*

Note that Barbara Loe Fisher is all for vaccine safety. But given that Congress declared vaccines unavoidably unsafe with the passage of the 1986 Act, how can anyone possibly make a safe vaccine? At no point in time has Barbara Loe Fisher or NVIC attempted to fight the mandatory vaccines. The only thing this witch is doing is *pretending* to try to make the companies financially liable. But we know this is an act, because **she's the one responsible for helping to write the law.**

*The federal government has pressured states to set up tracking systems to tag and track all children from birth to ensure that they are injected with multiple vaccines, all of which have not been adequately studied to evaluate their impact on humans at the cellular and molecular biology level.*

*"Nor is there informed consent in America when it comes to vaccination," said Fisher. "At its core, forcing individuals to risk injury or death without their consent is a violation of civil and human rights, the Nuremberg Code, and the Helsinki Declarations. In principal, it is also a violation of the tenets embodied in the scriptures of every major religion. If the State can tag, track down, and force American citizens against their will to risk injury and death by being injected with biologicals of unknown toxicity today, there is no limit on what freedoms the State can take away in the name of the greater good tomorrow."*

Sounds reasonable if you don't understand that she's controlled opposition. She is all talk and no game.

*Marge Grant, however, another founding member of the NVIC, argued that talk is cheap. Actions speak louder than words. Grant, who protested the "infamous" vaccine injury act's passage from the start, recalled that **Barbara Loe Fisher and allied vaccine industry lobbyists were largely to blame for the law's inadequacy.***

*"They are to blame," Ms. Grant said of Fisher and another NVIC Past- President, attorney Jeffrey Schwartz. "Schwartz was so politically involved, and the politics were so thick you could cut them with a knife.*

*"I want to regurgitate every time I hear those 'dedicated voices' screaming against the many new vaccines and vaccine procedures being mandated when indeed **they are responsible** .... Don't forget, they [the vaccine manufacturers] were relieved of all of this [responsibility] with the **passing of the infamous 'no-fault' compensation program thanks in large measure to Schwartz, Fisher, and [current NVIC Director Kathy] Williams.**"*

## **National Vaccine Information Center (NVIC) Does Not Want to Repeal the 1986 National Vaccine Injury Act**

The 1986 Act, which was written by Barbara Loe Fisher, NVIC and others, and passed by Congress removed ALL LIABILITY FROM THE VACCINE MANUFACTURES. NOBODY CAN SUE THEM, THANKS TO THESE PEOPLE.

So, how come they're not fighting to repeal it?

Because, like Del Bigtree, Andrew Fakefield, Dolores Cahill, RFK Jr. and all the rest of these liars - they are all working for Big Pharma and they are all 100% Pro-Vaccine demons and deceivers. They receive their funding from billionaire hedge funds who **invest in vaccine companies.**

## **National Tort Reform Changed U.S. Medical Malpractice and Product Liability Laws**

In addition, product liability and personal injury tort reform legislation enacted by Congress and state legislatures since the 1970s has severely restricted class action, medical malpractice and product liability lawsuits in federal and state courts. Wealthy corporations and insurance companies have successfully lobbied to restrict the amount of awards or block the right to a jury trial for ordinary citizens so that the legal rights of corporations and government often prevail over the legal rights of individuals.<sup>14 15</sup> This national tort reform trend to shield industry and medical trade organizations from financial accountability in civil courts for harm caused to individuals was reflected in the 2011 Supreme Court majority decision to, in effect, create new vaccine product liability law instead of correctly interpreting existing law in the 1986 Act.

### **NVIC Does Not Support Total Repeal of the 1986 Act.**

In recognition of current personal injury and product liability lawsuit restrictions in U.S. courts and the nearly unanimous passage of the 21<sup>st</sup> Century Cures Act by Congress in 2016, which further lowered FDA licensing and informed consent standards,<sup>16 17</sup> **NVIC does not support a campaign to totally repeal the 1986 Act.** Not only is it not politically viable, but it would also give industry, medical trade organizations and federal agencies exactly what they want: another opportunity to lobby Congress to amend the Act to make it worse.

Now that we understand who Fisher *really* is, let's watch [this video](#).

Think long and hard about what her deception is and ask yourself - where has she been for the last 19 months?

**LEARN THE GAMES THESE PEOPLE PLAY. THEY ARE ALL ON THE SAME TEAM. BARBARA LOE FISHER AND NVIC ARE CONTROLLED OPPOSITION AGENTS, WORKING FOR BIG PHARMA.**
